

ETTh1: no fixed depth or width is optimal across all time windows

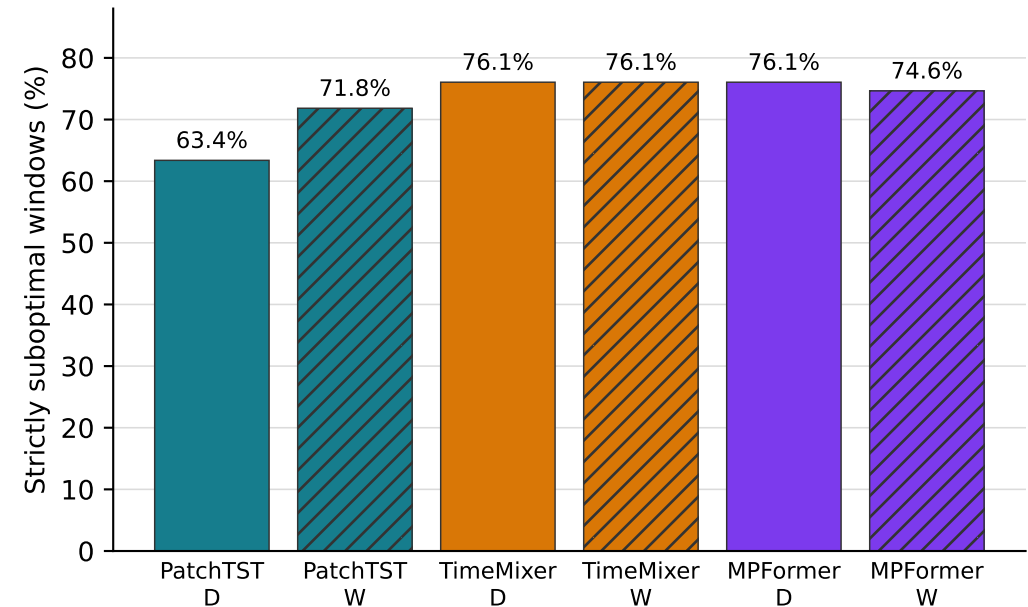

A. Strict per-window optimum changes across time

B. Per-window oracle improves on the best fixed model

C. The best fixed model misses most windows

3 backbones | 142 sampled windows | horizon 96 | MSE | seed 3407. D = depth, W = width. Test-target oracle measures headroom; it is not a deployable selector.
